Make Your Own Paper Plane
INTREPID MUSEUM

1. First, choose the type of paper you would use and lay it out in front of you.

3. Open the paper back up.
2. Fold the paper in half long-ways and press down on the fold.
4. Fold the top corner down along the center fold so that it makes a triangle.

5. Make the same fold on the other side so that the top of the paper makes a big triangle. Press down.

6. Now, fold one side in towards the center, so that the edge touches the center fold line again and press down.

7. Make the same fold on the other side.

8. Fold your plane in half so that the folds you have already made are on the inside.

9. Now, fold one side down , starting about 2 inches away from the point.

10. Flip your plane over and make the same fold on the other side.

11. Open the wings up and your plane is ready to fly. Bring it to the runway to test it out!
